Motivated full-stack developer with a background in economics. Trained in MERN stack (Web Applications) with Agile methodology (SCRUM), my coding foundations were built on the latest technologies & trends with the main focus on accessibility and usability for better responsive web applications.

PROFESSIONAL EXPERIENCE

Studio Graphene, Lisbon

JUN 2022 - Present

Frontend Developer (full-time)

- With a team of ten developers, we created two complex web softwares for a medium-size rental car company in less than 6 months.
- Worked together with and was mentored by developers with more than 12 years of experience
- Wrote code from scratch using JavaScript, React.js, Next.js, Redux.js, CSS, HTML and other Frontend tools.
- Utilized GIT for version control and aided team lead in reviewing all code (correctly statically typed) for the front-end repo.
- Created complex reusable components to be implemented in the rest of the application.

IronHack, Lisbon

JAN 2022 - MAR 2022

Full Stack Developer / Bootcamp

- Opus CRM, full-stack MERN application with a decoupled backend.
- theBooth, SSD (server-side rendering) social platform framework.
- GeoPhysCollision, front-end project that involved creating a themed HTML Canvas product.

Atos, Spain

MAR 2020 - SEP 2021

IT SPECIALIST SERVICE DESK

- I performed more than 16,200 troubleshooting and technical assistance on excel, outlook, teams/skype, Cisco any connect, Cisco Jabber, Citrix workspace, SAP systems, quick assist, workspace one, intelligent hub, landesk, IOS, android and several other platforms.
